

Supported Website User Interface Updates

1 Responsibilities of dRaX ARTS

dRaX ARTS will maintain the following responsibilities with regards to the University of Nigeria website project and will consider all other functions or requests outside the scope of this document billable and subject to negotiations not necessarily adding to or depreciating this current agreement.

1.1 User Interface Updates/Upgrade

1.1.1 User Interface layout redesign

A change to the user interface which includes the following may be carried out twice a year for the purpose of enhancing user experience and keeping the website fresh.

1.1.2 User Interface color variation

The current color panel may be adjusted twice a year to represent seasonal change or the advent of a major event on campus.

1.1.3 Minor User Interface adjustments

These may include the change of:

1. text color
2. color of hyperlinks or their variation due to user interaction
3. change of images on the user interface

1.2 Deployment Workflow

The changes will be deployed observing the following steps

1. Code tested on the development server by dRaX ARTS development team
2. After approval, the source files are sent to UNN development team for upload and installation on the production server
3. Code is tested by UNN development on the production server
4. Code goes live after validation

2 Responsibilities of University of Nigeria

Provide any content required by the dRaX ARTS development team to make all content and user interface updates.
